

# -)'(- Wrongotwn! Flag Specification

Flags should be made out of lightweight material. The pocket in the leading edge should be a large enough diameter to fit over a 2" pole or 1.5" PVC which is 1.9" at it's outside diameter. You could use a piece of PVC to check and see if it's large enough. In metric countries use 50mm PVC as it's better to go a bit too big than too small!!

They should contain elements from your group, country, culture, sense of humor, pretty much anything you can think of.

Feel free to make multiple flags if you guys are so inclined! Maybe a flag for your country and another for your group of friends!

We'll be using the flags as the border and frontage of the camp and we'll also be putting a few up on the scaffold observation platform for decoration!
